Allicillin™

Garlic Sulfides + Ajoene

GASTROINTESTINAL HEALTH*

Designs for Health's Allicillin™ features 200 mg per 1-softgel serving of Garlicillin™, which consists of a blend of garlic oil and parsley oil to support immune, cardiovascular, and liver health and promotes a healthy microbial environment and healthy inflammatory responses.* The garlic oil in Allicillin™ provides 20 mg per 1-softgel serving of garlic sulfides and ajoene, which are the primary bioactive and bioavailable compounds in garlic. The formula is designed with an enteric coating to help minimize potential garlic odor. Additionally, the parsley oil may serve as a breath freshener.*

Garlic contains many compounds that may promote a broad range of health benefits.* These beneficial compounds appear only when the fresh garlic cloves of the plant are crushed, chopped, or chewed. Allicillin™ offers beneficial compounds of garlic in a bioavailable form.* Ajoene and garlic sulfides are primary compounds in garlic that may promote a healthy microbial environment and diversity, and these properties may also promote healthy immune responses.* Ajoene and garlic sulfides may also support proper inflammatory responses and cardiovascular health.* Garlic sulfides may promote liver health by supporting the normal function of detoxification pathways.*

Benefits*

- Supports immune health
- Promotes a healthy microbial environment
- Supports proper inflammatory responses
- Promotes liver health
