

Astaxanthin

Microalgae Extracted Carotenoid

FOUNDATIONAL HEALTH*

Astaxanthin is a powerful carotenoid from the microalgae *Haematococcus pluvialis*, which is one of the richest sources of natural astaxanthin. It's reddish pigment that gives crustaceans such as krill, lobster, shrimp, and salmon their vibrant pink color. The unique structure of astaxanthin enables it to provide superior support for cell membrane and to support antioxidant status in the body.* The astaxanthin in this product is extracted directly from microalgae by using a solvent-free technology that ensures maximum control and purity and allows optimal bioavailability and stability.

Astaxanthin supports the body's antioxidant status and helps promote a healthy inflammatory response.* Its structure enables it to interact with cell membranes, supporting their integrity. This unique structure of astaxanthin supports antioxidant status to help protect against lipid oxidation that may cause damage.* Astaxanthin also supports skin integrity, brain health, glucose metabolism, and cardiovascular health.*

Benefits*

- Supports antioxidant status in the body
- Helps promote a healthy inflammatory response
- Supports skin integrity
- Brain health

Recommended Use

Take 1 softgel per day or as directed by your health-care practitioner.

AstaREAL® is a registered trademark of Fuji Chemical Industry Co., Ltd.

Highlights

- 6 mg of astaxanthin as AstaREAL® sourced from *Haematococcus pluvialis*
- Extracted directly from microalgae by using solvent-free technology for enhanced purity
