

CT-Biotic

DIGESTIVE AND DETOX SUPPORT*

KEY BENEFITS

- Contains spore-forming and non-spore-forming probiotic strains
- Supports optimal digestion and immune function*
- Protects strains with proprietary BioActive Carbon® Technology for effective delivery

PRODUCT DESCRIPTION

CT-Biotic is specially designed with 11 carefully selected spore-forming and non-spore-forming bacterial strains to feed and encourage friendly gut bacteria growth.* This product provides a balance of bacterial strains that are essential for supporting natural detoxification, digestion, immunity, and microbiome health.*

These 11 specific probiotic strains are known to exist naturally and symbiotically in the human GI tract, but often in insufficient amounts. Therefore, adding a probiotic as a dietary supplement helps to maintain

more of this beneficial bacteria to support the gut more effectively.

Traditional non-spore-forming probiotics rarely survive the acidic environment of the stomach. With the inclusion of BioActive Carbon® Technology (consisting of a proprietary blend of fulvic extracts), CT-Biotic protects all the bacterial strains from stomach acid so the beneficial bacteria cultures arrive intact in the GI tract. These carbons also provide nourishment for the microbiota strains to support healthy gut biodiversity.*

LABEL INFORMATION

Directions: Take 1 capsule twice daily, with food or as otherwise directed by a healthcare practitioner.

Handling Instructions:
Refrigerate after opening.

WARNING: Please consult your healthcare practitioner before use if you are pregnant, breastfeeding, or considering use for a child.

KEEP OUT OF REACH OF CHILDREN.
