

Metabolic Synergy™

Multivitamin/Mineral Formula to Promote Healthy Carbohydrate Metabolism*

MSC180 | 180 vegetarian capsules
MSC360 | 360 vegetarian capsules

When we consume too many carbohydrates over a long period of time, it may become difficult to regulate healthy blood sugar. Consistently elevated blood sugar can lead to suboptimal carbohydrate metabolism, which, over time, may negatively impact nearly every organ in the body, such as the pancreas, liver, kidneys, eyes, brain, and more.

That's where Metabolic Synergy™ can help you. This expertly crafted multivitamin/mineral supports the normal conversion of carbohydrates to be used as fuel for the body.* It also helps promote an appropriate response to the hormone insulin for optimal blood sugar balance and metabolic support.* It features carefully chosen nutrients not typical in commonly used multivitamins for their demonstrated abilities to help maintain stable blood sugar and insulin function.*

ENDOCRINE/METABOLISM*
