

Pancreatic Enzyme Complex™

Enteric coated enzymes for digestive support*

CD PZM090 | 90 vegetarian capsules

Pancreatic enzymes are necessary to properly digest and absorb nutrients from the proteins, carbohydrates, and fats we eat. Only when foods are properly broken down and absorbed can the body benefit from the essential vitamins and minerals they contain. Unfortunately, as we age, pancreatic enzyme secretion in the small intestine can decline. Pancreatic Enzymes Plus is a superior blend of porcine-derived enzymes designed to support individuals who need a little extra digestion support and for those who experience tummy troubles, especially after consuming protein-rich or fatty foods.*

GASTROINTESTINAL HEALTH*

Aids in the digestion of protein, carbohydrates, and fats*

Support for occasional indigestion, particularly after eating fatty and protein-rich meals*

Helps minimize occasional gas and bloating*

Promotes the absorption of essential fats and the fat-soluble vitamins A, D, E, and K*

May help those with insufficient pancreatic enzyme secretion or function*

May help support normal stool consistency*

Consult with your health-care practitioner about your specific circumstances and any questions you may have.

Note: Contains pork

JUST THE FACTS:

Compare supplement facts to the leading brands

- Supports fat digestion and absorption*
- Proteolytic enzymes that break down proteins*
- Helps break down carbohydrates and starches*
- Promotes the emulsification and absorption of fats and fat-soluble vitamins, especially for those without a gallbladder*
- Proteolytic enzyme derived from the pineapple plant that supports protein digestion and a healthy response to inflammation*
- Delayed-release, enteric-coated capsules protect the enzymes from being destroyed by stomach acid, preserving their release and activation in the small intestines
