

# Resveratrol Supreme

Resveratrol + Quercetin

Resveratrol Supreme is designed to support antioxidative status, promote healthy aging, and help support normal cellular repair.\* This formula contains clinically relevant amounts of Trans Resveratrol (Veri-te™) and quercetin.

Resveratrol is a molecule found in grape skin, peanuts, and berries like blueberries and raspberries. It is known for its role in supporting antioxidative status, a healthy inflammatory response, and cardiovascular and metabolic functions within the human body.\* Research indicates that resveratrol may also help support immune health, a healthy gut microbiome, and the body's response to cellular senescence.\* Cellular senescence is a process in which bodily cells age and permanently stop dividing but do not die. This process can occur

during the natural aging process. Over time, these old or aged (senescent) cells can accumulate in tissues throughout the body and can release substances that may damage nearby healthy cells.

Quercetin is a molecule abundant in onions, apples, green tea, and various other fruits and vegetables. Studies have shown that quercetin supports antioxidative status, a healthy inflammatory response, and the elimination of senescent (old) cells.\*

Resveratrol Supreme may be ideal for individuals concerned with healthy aging, in need of support for antioxidative status, or seeking support for healthy cellular repair, function, and regeneration.\*

## Benefits\*

- Promotes healthy antioxidative status
- Helps support healthy aging
- Promotes cellular repair and maintenance
- Helps support cardiovascular health

## Recommended Use

Take 1 capsule per day, or as directed by your health-care practitioner.

## Highlights

- Provides 200 mg of trans-resveratrol and 200 mg of quercetin to support antioxidative status and cellular maintenance\*
- Gluten-free, dairy-free, soy-free
- Non-GMO

Veri-te™ is a trademark of Evolva or its affiliates in the US and other countries.
